Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on August 25, 2004 has been entered.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

Applicants' argument (see page 5, last paragraph of Applicants' "Remarks/Arguments" filed August 25, 2004) that the claims recite that the outer wall foil alloy contains at least 24 atomic percent rhodium and that none of the prior art discloses such a feature, is persuasive. The closest art is U.S. Patent 3,423,069 to Chandley, which discloses that an outer wall foil 28 alloy may be 20 or 40 percent rhodium, but this is by amount and not by atomic percent. None of the prior art of record discloses or suggests that the outer wall foil alloy contains at least 24 atomic percent rhodium.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
